

COURSE ANNOUNCEMENT

Are you ready for an update in

PEDIATRIC HEMATOLOGY AND ONCOLOGY?

Join the Open Medical Institute
in Mexico to learn from experts
in your field!

Michele Lambert, MD
Alix Seif, MD
Course Directors

The Open Medical Institute presents a seminar in Pediatric Hematology and Oncology at the School of Medicine and Health Sciences, Tec de Monterrey in Mexico City, Mexico. Led by experts from the world-renowned Children's Hospital of Philadelphia (CHOP), the course is held over three days and provides participants with the necessary knowledge to accurately diagnose and treat cancer and blood diseases in children. The seminar consists of lectures, discussions, and case presentations.

May 6-8, 2024

Pediatricians
Hematologists
Oncologists

PEDIATRIC HEMATOLOGY AND ONCOLOGY

The seminar targets clinicians in the areas of Pediatrics, Hematology, and Oncology, having either completed their specialization or being in the final phase of their residency. Participants must be fluent in English, which allows for intense interaction during lectures and discussions.

Attendance is mandatory for the entire course. Fellowships cover tuition, course materials, certificates, and meals.

Apply by:

March 11, 2024

PEDIATRIC HEMATOLOGY AND ONCOLOGY

Lectures:

- Cancer predisposition
- Hemoglobinopathies and red blood cell disorders
- Acute lymphoblastic leukemia
- Stem cell transplantation
- Supportive and palliative care
- Immune dysregulation and marrow failure
- Lymphoma
- Late effects of cancer therapy
- Bleeding and thrombosis
- Acute myeloid leukemia

PEDIATRIC HEMATOLOGY AND ONCOLOGY

Learning Objectives:

- Reviewing common oncologic presentations, diagnoses, treatments, and advances.
- Describing recent diagnostic and therapeutic advances in histiocytic and other immune dysregulation syndromes.
- Highlighting innovations in use of small molecule inhibitors, targeted immunotherapies, and cellular therapies in stem cell transplantation, and solid and liquid tumors.
- Enumerating common cancer predisposition and inherited marrow failure syndromes.
- Recognizing optimal approaches to supportive and palliative care for pediatric cancer patients.
- Evaluating novel treatment modalities for non-malignant hematologic disorders.
