Learning Objectives for Participants

At the conclusion of this seminar, the participant should be better able to:

1. Explain the impact and underlying mechanisms of immunocompromise on infectious disease.
2. Develop a deeper understanding of antibiotic mechanisms, pharmacodynamics, resistance, and stewardship.
3. Solidify approaches for diagnosis and treatment of infectious diseases in infants, children, and special populations.
4. Establish the microbial and global context for pathogenesis and the spread and of infectious disease.
