Learning Objectives for Participants

At the conclusion of this seminar, the participant should be better able to:

1. Review common oncologic presentations, diagnoses, treatments and advances.
2. Describe recent diagnostic and therapeutic advances in histiocytic and other immune dysregulation syndromes.
3. Highlight innovations in use of small molecule inhibitors, targeted immunotherapies, and cellular therapies in stem cell transplantation, solid and liquid tumors.
4. Enumerate common cancer predisposition and inherited marrow failure syndromes.
5. Recognize optimal approaches to supportive and palliative care for pediatric cancer patients.
6. Evaluate novel treatment modalities for non-malignant hematologic disorders.
