

# COURSE ANNOUNCEMENT

Are you ready for an update in

## PEDIATRIC INFECTIOUS DISEASES?

Join the Open Medical Institute  
in Mexico to learn from experts  
in your field!

Paul J. Planet, MD, PhD  
Course Director

Children's Hospital  
of Philadelphia®

The Open Medical Institute presents a seminar in Pediatric Infectious Diseases at the CMABC Santa Fe in Mexico City, Mexico. Led by experts from the world-renowned Children's Hospital of Philadelphia (CHOP), the course is held over three days and provides participants with the necessary knowledge to accurately diagnose and manage acute and chronic pediatric infectious conditions. The seminar consists of lectures, discussions, case presentations, and a round table.

June 10-12, 2024  
CMABC Santa Fe

Pediatricians  
Internists

# PEDIATRIC INFECTIOUS DISEASES

The seminar targets clinicians in the areas of pediatrics and internal medicine, having either completed their specialization or being in the final phase of their residency. Participants must be fluent in English, which allows for intense interaction during lectures and discussions.

Attendance is mandatory for the entire course. Fellowships cover tuition, course materials, certificates, and meals.

Apply by:

April 15, 2024

# PEDIATRIC INFECTIOUS DISEASES

## Lectures:

- Antibiotic Mechanisms and Resistance
- Pharmacokinetic/ Pharmacodynamic of Antibiotics
- Common Serious Infections in Kids 1  
(Skin and Soft Tissue Infection, Meningoencephalitis)
- Common Serious Infections in Kids 2  
(Pneumonia, Urinary Tract Infection)
- Common Serious Infections in Kids 3  
(Sepsis, Osteomyelitis)
- Immunology and Immunodeficiencies 1
- Immunology and Immunodeficiencies 2
- TORCH Infections
- Microbial Medicine
- Respiratory Pathogens and Vaccines
- Basic Stewardship

# PEDIATRIC INFECTIOUS DISEASES

## Learning Objectives:

- Recognize and describe common infectious presentations, diagnoses, management, and treatments.
- Explain the mechanisms, range, pharmacokinetics/ pharmacodynamics of antibiotics, and the resistance mechanisms associated with them.
- Recognize the major types of immunodeficiency and the likely infections associated with them.
- Describe the goals and implementation strategies for antibiotic stewardship.
- Understand the impact of the microbiome on infectious disease.
- Describe basic concepts and new updates on vaccines.
- Recognize and describe infectious diseases in the perinatal period.
